

Partnerships Policy

We are often asked to partner with other organisations. There are benefits to partnerships and alliances, but they can also come with risks that need to be carefully considered.

Our Partnership Policy guides how we approach partnership arrangements.

We have grouped our partner relations into 3 categories: Project Partnerships, Strategic Partnerships and Alliances.

The purpose of this policy is to:

- Articulate the principles and procedures applied by Dietitians Australia when engaging in partnership arrangements.
- Help Dietitians Australia in identifying and managing both the risks and benefits that flow from partnership arrangements.
- Achieve effective, transparent, and accountable partnership arrangements.
- Outline who within Dietitians Australia has delegated authority to make partnership decisions.
