

EAC Consultation - Submission

We put forward 3 recommendations:

R1: Formally recognise Accredited Practising Dietitians (APDs) as Positive behaviour support for older children and adults (PBS) providers delivering intervention for eating-and drinking related behaviours of concern.

R2: Embed APDs within multidisciplinary PBS teams to strengthen holistic, person-centred care.

R3: Include responsive feeding (RF) as a behavioural intervention within PBS and provide a definition of the role of APDs as RF behavioural intervention providers
